- MySQL
- Photoshop

PROJECTS

TRAVEL AND TOURISM PROJECT

Recently I completed Travel and Tourism project used Python with Django framework. This web project is helped to customers can interact directly book rooms and buy packages. Because they can get best price and good service.

The project was I completed using python web technology. I used Django as framework and PostgreSQL to connect to Database and there I was used front end part HTML5 there for I used Bootstrap and CSS to make it attractive.

COLLEGE MANAGEMENT (Mini PROJECT)

COLLEGE MANAGEMENT was my college project. The project was completed our four members team. The project was mainly including college attendance and library management and there we also included some previous question papers and answers.

This project we completed using PHP as a server side and Android in front end part and there we used SQL to connect Database.

Mainly we divide two part of this project one is admin and another user. The admin part managed college administrations and students are used the user side. That will helped to students when come the exams they can study easy to face exams.

DECLARATION

I here by declare that above mentioned details are true to the best of my knowledge and belief.
